THE SOUTH AFRICAN INSTITUTE OF MINING AND METALLURGY

OFFICE BEARERS AND COUNCIL FOR THE 1975-1976 SESSION

Honorary President

R. S. Lawrence
President, Chamber of Mines of South Africa

Honorary Vice-Presidents

The Honourable S. P. Botha
Minister of Mines, Immigration, Sport and Recreation
The Honourable S. G. J. van Niekerk
Administrator, Transvaal Province
The Honourable G. F. van L. Froneman
Administrator, Orange Free State Province
T. L. Gibbs, Government Mining Engineer

President

Dr R. E. Robinson

Immediate Past President

Prof. R. P. Plewman

Vice-Presidents

Dr M. D. G. Salamon
P. A. Von Wielligh

Honorary Treasurer

J. K. E. Douglas

Ordinary Members of Council

Dr M. G. Atmore	Dr D. I. Legge
C. T. Fenton	D. G. Malan
Dr P. R. Jochens	C. T. Shaw
Prof. R. P. King	D. A. Viljoen
Dr D. G. Krige	H. M. Wells

Branch Chairmen

E. A. Jackson, Witbank-Middelburg Branch
G. J. C. Young, O.F.S. Branch

Past Presidents Serving on Council

R. J. Adamson	Dr J. P. Hugo
H. Britten	D. M. Jamieson
H. C. Cross	D. G. Maxwell
J. K. E. Douglas	Dr J. T. McIntyre
R. C. J. Goode	V. C. Robinson
Prof. D. D. Howat	P. W. J. van Rensburg

Corresponding Members of Council

United Kingdom: R. H. McWilliam, D. J. Rogers,
H. W. McCulloch

Australia: G. A. MacKay

Canada: Prof. B. W. Mackenzie

Federation of Societies of Professional Engineers

Representatives: J. K. E. Douglas, P. W. J. van Rensburg

Alternates: Prof. R. P. Plewman, G. H. Grange

Council of Commonwealth Mining and Metallurgical Institutions

D. J. Rogers G. J. Mortimer

The Associated Scientific and Technical Societies of South Africa, Controlling Executive

Representatives: Dr R. E. Robinson, Prof. R. P. Plewman

Alternates: P. A. Von Wielligh, Dr M. D. G. Salamon

Honorary Legal Advisers

Messrs Van Hulsteyn-Douglas

Auditors

Messrs Alex. Aiken & Carter

Secretaries

Associated Scientific and Technical Societies of South Africa,
Kelvin House, 2 Holland Street, Johannesburg.
Telegraphic Address: Perspicax

P.O. Box 61019
Marshalltown, Tvl.

**PAPERS AND NOTES READ BEFORE THE INSTITUTE
AND PUBLISHED IN VOLUME 76**

The performance of the improved microclimate suit, by N. B. Strydom, A. J. S. Benade, and W. H. van der Walt	1
Suggested thermal stress limits for safe physiological strain in underground environments, by J. M. Stewart and C. H. Wyndham	6
Electrolytic precipitation of ammonium diuranate, by A. W. Bryson	13
A model for the leaching of non-porous particles, by B. K. Loveday	16
The crystallization of rutile from titaniferous slags, by R. A. H. Lycett, P. R. Jochens, and D. D. Howat	20
Lecture: Effect of automation on operational technology and workers' opinions in concentrators, by Antti J. Niemi	26
Apportionment of fine gold to source supply by means of broken ore sampling, by P. Kraus	34
Ore sorting according to electrical conductivity, by A. Balint	40
New developments in high-tonnage photometric sorting, by M. A. Schapper	42
The fracture and thermal weakening of quartzite in relation to comminution, by A. Kanellopoulos and A. Ball	45
Considerations in the application of autogenous milling, by G. G. Stanley	53
The 84-inch Gyradisc crusher, by W. F. de Lange	55
Automatic control of feed of autogenous grinding media, by W. R. Flook	60
Large diameter tube mills, by R. D. Beck	64
Operating experience with ring ball mill grinding on abrasive ore, by D. M. Meyer	67
Progress in the application of the Ring and Ball Pulveriser to the mining and metallurgical industry, by D. A. Bullivant	69
Developments in centrifugal milling, by A. A. Bradley, A. J. Freemantle, and P. J. D. Lloyd	78
A peripheral discharge mill at Winkelhaak, by D. M. Pretorius	81
Fine sizing in milling circuits, by S. K. de Kok	83
An evaluation of the Wallis Ultrasonic Separator for fine screening, by N. D. Jagger and S. Fick	86
Full-scale testing of centrifuge separators for use in slime tailings disposal, by I. K. M. Chaston and C. Forsdyke	89
Desliming techniques for tin slurries prior to flotation, by A. Buncombe	93
The Reichert Cone gravity concentration pilot plant, by J. McLean	95
Gravity recovery of fine tin using the Bartles Mozley concentrator, by L. M. Falcon	98
The recovery of pyrite from Witwatersrand gold ores, by R. N. Guest	103
Compound water cyclones as a means of fine coal cleaning, by S. R. Farinha	105
New drum type heavy-media separator for South Africa: Bretby Snail Separator, by W. D. Jacobs	106
Some potential applications of wet high-intensity magnetic separation, by W. Keleghan	108
The application of magnetohydrostatic separation to metallurgical problems, by I. J. Lin and N. P. Finkelstein	111
Potentialities of magnetohydrostatic separation using solutions of salts of rare earth elements, by U. T. Andres	113
Selective flocculation of cassiterite, by E. A. Appleton, C. R. A. Claus, and J. J. Vink	117
An assessment of the efficiency of the Dryflo concentrator by the use of specific gravity markers, by P. W. Overbeek	120
The depression and deactivation of sphalerite, by S. A. Allison, P. J. Harris, and F. Marsicano	123
The effects of froth height, aeration rate, and gas precipitation on flotation, by J. A. Engelbrecht and E. T. Woodburn	125
Oil-levitation extraction — a variation of flotation, by L. A. Gould, I. J. Lin, V. M. Lovell, and N. P. Finkelstein	132
A method of reducing uncertainty in the estimation of flotation plant recovery, by E. M. Buchalter and C. E. Smith	134
The beneficiation of residue at Blyvooruitzicht Gold Mine, by G. D. Louw and P. A. Laxen	136
Gold concentration by flotation, by S. K. de Kok	139
The use of an energy-dispersive X-ray spectrometer to provide rapid analysis for flotation control, by O. R. Truby	141
The influence of chemical environment during milling on the flotation of zinc from complex sulphide ores, by L. A. Bushell and M. L. Veitch	143
Palabora Mining Company's gas scrubbing plant, by D. A. Edge and J. S. Adams	145
The case for large flotation cells, by M. J. Prevett	149
Simulation of ore dressing plants, by R. P. King	152
A flexible mill control programme, by R. J. Adey	156
Progress in assessing plant operating data, by J. G. MacKay and P. J. D. Lloyd	162
A quantitative model for mineral liberation, by R. P. King	170
Circulation patterns in a pachuca, by D. F. van der Merwe and A. J. Swierstra	172
Commissioning of a process control computer at Consolidated Diamond Mines, by A. R. Brimmer and C. D. Franklin	176
The case for national research in mineral processing: Presidential Address, by R. E. Robinson	196
Notes on Iron Age copper-smelting technology in the Transvaal, by H. M. Friede and R. H. Steel	221
Ingot casting and wire drawing in Iron Age Southern Africa, by R. H. Steel	232
The industrial application of a uranium dioxide electrode, by C. R. S. Needes, M. J. Nicol, N. P. Finkelstein, and G. T. W. Ormrod	238
Mining practice in the Kimberley Division of De Beers Consolidated Mines Limited, by J. V. Cleasby, H. J. Wright, and M. T. G. Davies	247
The improved rate of stope-face advance at Buffelsfontein Gold Mining Company Limited, by B. P. Christos	273
Potential for the mechanization of stoping in gold mines, by N. C. Joughin	285
Primary fracture from an array of shot-holes, by C. M. Lownds and P. C. Seligmann	307
The use of face conveyors in gold mines, by N. C. Joughin and A. C. Buckmaster	315
The development of drilling and blasting practice at Palabora Mining Company Limited, by C. C. Crosson, M. J. H. Tonking, and G. Paterson	325
Design criteria and recent developments in large-capacity Wemco flotation cells, by P. Kind	345
Rheological measurements on pulps from South African gold mines, by G. S. Hansford, C. D. Levy, and J. W. de Kock	363
Note: The practical application of microclimate cooling in an underground stope in a gold mine, by C. H. Johannes, C. H. van Graan, N. B. Strydom, and J. G. van Heerden	370
The investment decision under uncertainty, by H. M. Wells	375
Some basic considerations in the application of geostatistics to the valuation of ore in South African gold mines, by D. G. Krige	383
The optimization of sample spacing in South African gold mines, by J. M. Rendu	392
A kinetic study of the leaching of pentlandite in acidic ferric sulphate solutions, by I. J. Corrans and M. T. Scholtz	403
A unique means of obtaining sea-water, by G. R. W. Walker	412
The Metsep Process for the separation and recovery of zinc, iron, and hydrochloric acid from spent pickle liquors, by T. H. Tunley and T. D. Sampson	423
The use of large OK-16 flotation machines at the concentrators of Outokumpu Oy, by O. Korhonen and T. Leskinen	433
The limitations of gold-mine evaluation, by P. R. Janisch	439
Note: The development of Agitair flotation machines, by J. P. Dreyer	445
Note: A revised method of heat acclimatization, by N. B. Strydom, W. H. van der Walt, P. L. Jooste, and H. F. Kotze	448
Variation in air temperature in a cross-section of an underground airway, by K. R. Vost	455
Tin mining and smelting in the Transvaal during the Iron Age, by H. M. Friede and R. H. Steel	461
Note: Melting techniques in the iron foundry, by J. T. Davies	471
